

## **Indigenous Traditional Medicinal Knowledge of Local Folk lore People of at Ananthagiri hills, Vikarabad District, Telangana**

**<sup>1</sup>Rapole Jyothirmai, <sup>2</sup>Dr.Regula Sunitha**

**<sup>1,2</sup>Assistant Professor of Botany, Government Degree College (W), Karimnagar**

### **ABSTRACT**

The life of the Folk lore is intimately connected with the plants in their day-to-day activities. They are dependant on the plants for their food, clothes, shelter, medicine, beverages, binding material, oils, resins, etc. The paper deals with the indigenous Traditional medicinal knowledge of local Folk lore people of medicinal plants used to cure various diseases and ailments available in Ananthagiri hills, situated in Vikarabad district Telangana state. A total of 250 plant species belonging to 80 families are documented. The ethnobotanical data obtained from local inhabitants revealed that 113 diseases find curative chemical constituents in 250 plant species.

**Keywords:** Ananthagiri hills, Ethinic Botany, Ethnobotany, Healthcare, Medicinal plants, Traditional knowledge, Vikarabad district, Telangana state,

### **INTRODUCTION**

The word ‘ethno’ means a group of people sharing common origin, culture, language, customs, beliefs, traditions, etc., and ‘botany’ is the study of plants.<sup>2</sup> Thus, Ethnobotany is a hybrid term, with anthropological approach to plant science. For Ethnobotanical study, there should be close working relationship between botanists, ecologists, anthropologists, chemists, soil scientists, pharmacologists. While botanists are required to identify the plants, the others are required for ecology and environment, for gathering the data of the plants used by the ethnic groups, for phytochemical analysis, for noting down the details of soil and for testing the efficacy of native dugs. Since the past the people had tried to gain knowledge about the plants their uses. Plants have basic nessesity to full fil their basic requirements like food, shelter etc. the modern medicines used now have their orgin from the traditional medicinal knowledge. Many drugs are originated from the knowledge about the plants in traditional and folk medicine.<sup>5</sup> World wide 80% of the population in developing countries still depends on traditional medicine for their primary health care as per world health organisation.<sup>3</sup> The traditional medicinal plants depict the socio–culture,spiritual and medicinal area of rural tribal familes. The very name Ethnobotany indicates that it is an interdisciplinary science<sup>1</sup>. The life of the tribals is intimately connected with the plants in their day-to-day activities. They are dependant on the plants for their food, clothes, shelter, medicine, beverages, binding material, oils, resins, etc. The tribals have small families. They employ some plants for contraception.<sup>7</sup> A further enquiry, in this line, may bring the population in general, under control. In India, plants have been used in traditionalmedicine for several thousand years.,2500 plant species used by traditional healers, 100 species of plants serve as regular sources of medicineThe tribals use curare botanically known as

Chondrodendrontomentosumas hunting poison.<sup>6</sup> Later on it has been found by the scientific community that it contains tubocurarine, which is now being used as a painkilller and muscle relaxant<sup>2</sup>. A further investigation, on other plants, may lead to the discovery of new sources in this direction. The tribals use some plants as narcotics and hallucinogens. A further enquiry may lead to the discovery of new drugs for anesthesia. There are many remedies among the various traditional systems forcure,for a number of ailments.<sup>8</sup> Even now, due to poor condition of modern healthcare facilities, poverty, in-accessability to modern treatments, people of tribal and rural areas depend on medicinal plants to cure various diseases. <sup>3</sup>There is an intimate relationship between plants and human beings. There are several references of use of plants by man in the Indian epics. Plants were used by our ancestors, folklore and tribal societies. Many of the rituals are plant-based<sup>4</sup>. So, the present study is aimed at documentation of ethnomedical uses of flora of the Ananthagiri hills.<sup>7&9</sup>

## MATERIALS AND METHODS

The work was undertaken for about a period two years starting from June' 2017 to the end of June' 2019. The work is mainly confined to Ananthagiri Hills and its environs covering about a radius of 78 kms, which comes under Vikarabad reserved forest along with ethnic information. In the present study the non-tribals like forest officials, teachers, registered medical practitioners, local herbal healers, shepherds and farmers who had traditional knowledge about medicinal plants were consulted and further authentication of information and future reference, voucher specimens were collected. The main aim of the survey is to prepared ready checklist of medicinal plants present at and around Ananthagiri hills used by local herbalists and village folklore to cure various human ailments. The areas covered are Ananthagiri hills particularly at Ananthapadmanabha temple and its surroundings, followed by villages of Ananthagiripalle, Godhumaguda, Kerelli, Dharur, Durgamchervu, Nagasanipalle Tanda, Mohammadanpalle, Velichala, Mothukupalle, (Reserved forest), Narsimhuni gutta, Gattukesaram, Kondapur and Ramaiahguda. The data presented here is collected by frequent field visits by the author to these areas once in two months for about a period of two years. The information's on medicinal properties of plants is gathered from various sources such as consulting the local village heads, elderly people, Vaidyas, and other he bal practitioners. Help from Forest department personnel including DFO-Vikarabad and his associates weretaken during the survey.

## ENUMERATION TABLE NO.1

In the enumeration table No.1, the family and taxons are arranged alphabetically. Ethno botanical uses of some medicinal plant parts used by tribes for some disease

Sl. No.	Botanical Name	Family	Vernacular Name	Part	Aliment
1.	<i>Abrusprecatorius L.</i>	Fabaceae	Gurivinda	Leaves,	Earache Cough cold Skin diseases

2.	<i>Abutilon indicum</i> G.Don.	Malvaceae	Adavibenda	Leaves	Urinary problems
3.	<i>Acacia nilotica</i> (L) <i>Delilesub-sp indica</i> (Benth) Brenan.	Fabaceae	Nalla tumma	Leaves	Wounds Asthma Cough Dental problems. Cough Dysentery piles.
4.	<i>Acacia leucophloea</i> Willd.	Fabaceae	Tellatumma		Ulcer boils. Bronchitis Rheumatic Fever arthritis Diabetes.
5.	<i>Acalypha indica</i> L.	Euphorbiaceae	Muripinda	Whole plant	Eczema, skin problems Wounds
6.	<i>Acalypha alnifolia</i> Klen ex Willd.	Euphorbiaceae	Mirapakuppinta	Leaves	worms.
7.	<i>Acalypha paniculata</i> Miq.	Euphorbiaceae	Adavikuppinta	Whole plant	Eczema Skin diseases Scabies Urinary Problems worm infestations
8.	<i>Acanthospermum hispidum</i> DC.	Asteraceae	Sannapalleru	Whole plant	Skin diseases and in scorpion sting
9.	<i>Achyranthes aspera</i> L.	Amaranthaceae	Uttareni	Whole plant	Leucorrhoea Diarrhoea Jaundice Tooth pain Asthma
10.	<i>Actinopteris dichotoma</i> (Sw.) Link.	Actinopteridaceae	Pittakaalu	Whole plant	Dandruff Hair tonic Antifertility Antipyretic.
11.	<i>Adiantum incisum</i> Forsk.	Adiantaceae	Mayurasikha	Whole plant	Skin diseases.
12.	<i>Aerva lanata</i> (L).Juss.	Amaranthaceae	Konda pindi	Whole plant	Kidney stone Diabetes, boils cardiac diseases
13.	<i>Aerva javanica</i> (Burm.f.) Juss ex Schult.	Amaranthaceae	Peddapindikura	Whole plant	Kidney stone problems.

14.	<i>Aganosma cymosa</i> <i>G.Don.</i>	Apocynaceae	Maatalilata	Root	Snakebite. Diarrhoea
15.	<i>Agave americana</i> L.	Amaryllidaceae	Kittanara	Leaves,	Other uses
16.	<i>Ageratum conyzoides</i> L.	Asteraceae	Vaasavi	Whole plant	Wound healing Gastro intestinal disorders.
17.	<i>Aglaia roxburghiana</i> Sensu.Bedd.	Meliaceae	Yerraadugu	Leaves	Antidote Diabetes. Leprosy Throat Pain
18.	<i>Albizia amara</i> (Roxb.) Boiv.	Fabaceae	Konda sigara	Leaves	Dandruff Skin diseases Gonorrhea Piles.
19.	<i>Albizia lebbeck</i> (L.) Willd.	Fabaceae	Dirisena	Leaves	Antidote. Piles Diarrhoea
20.	<i>Allophylus cobbe</i> (L.) Raeusch	Sapindaceae	Chinna Kunkudu saali	Root	Diarrhoea.
21.	<i>Aloe vera</i> (L) Burma.f.	Liliaceae	Chinnakalabanda	Leave	Sexualy Diseases
22.	<i>Alternanthera pungens</i> Kunth.	Amaranthaceae	Mulla ponaganti	Leaves	Diabetes Gonorrhoea.
23.	<i>Amaranthus blitum</i> L.	Amaranthaceae	Totakura	Leaves	Urinary Problem kidney stones.
24.	<i>Amaranthus spinosus</i> L.	Amaranthaceae	Mulla Totakura	Leaves	Anaemia., Enhance lactation.
25.	<i>Andrographis paniculata</i> (Burm.f) Wall ex. Nees.	Acanthaceae	Nelavemu	Whole plant	Malaria.skin diseases feverAntidote.
26.	<i>Anisomeles malabarica</i> (L).R.Br.	Lamiaceae	Maga bira	Leaves	Rheumatic pains
27.	<i>Anisomeles indica</i> (L.) Kuntz.	Lamiaceae	Chinnaranabheri	Whole plant	Urination problem . Fever
28.	<i>Annona reticulata</i> L.	Annonaceae	Ramaaphalamu	Leaves Stem bark	DiarrhoeaDysentery
29.	<i>Annona squamosa</i> L.	Annonaceae	Seetha phalamu	Unripe Fruit, Leaves	DiarrhoeaDysentery Destroy lice insects
30.	<i>Anodendron paniculatum</i>	Apocynaceae	Atukuduteega	Root	Antifertility

	<i>m DC.</i>				dysentery.
31.	<i>Argemone mexicana (Willd) L.</i>	papaveraceae	Yerrikusuma	Yellow latex	Skin diseases Fever
32.	<i>Argyreia nervosa (Burm.f) Bojer.</i>	Convolvulaceae	Chandrapala	Roots	Wound healing Aphrodisiac
33.	<i>Aristida setacea Retz.</i>	Poaceae	Cheepuru gaddi	stem	Other uses
34.	<i>Aristolochia bracteolata Retz.</i>	Aristolochiaceae	Gadidagadapa	Leaves	Dandruff Snakebite Scabies Eczema.
35.	<i>Aristolochia indica L.</i>	Aristolochiaceae	Eswari	Leaves	Snakebite.
36.	<i>Artobotrys odoratissimus R.Br.</i>	Annonaceae	Teegasampenga	Leaves	
37.	<i>Asparagus racemosus Willd.</i>	Asparagaceae	Pilli gaddalu	Root	Fertility in women.
38.	<i>Asystasia gangetica (L.) T.And.</i>	Acanthaceae	Paadabeera	Whole plant	Joint pains.
39.	<i>Azadirachta indica A.Juss. W&amp;A.</i>	Meliaceae	Vepachettu	Leaves	Chickenpox Smallpox Malaria.
40.	<i>Bambusa tulda Roxb.</i>	Poaceae	Mulluveduru	stem	Other uses
41.	<i>Basella rubra L.</i>	Basellaceae	Yerrabatsalaku	Leaves	Leucoderma, Indigestion Kidney Stone Problems Gonorrhoea.
42.	<i>Bauhinia tomentosa L.</i>	Fabaceae	Kaanchinichettu	Young bbuds	Dysentery Cough Leucorrhoea.
43.	<i>Benkaramalabarica (Lam) Tirven.</i>	Rubiaceae	Pedda manga	Fruit	Abdominal pain ThroatInfections.
44.	<i>Boerhaavia diffusa L.</i>	Nyctaginaceae	Atikamaamidi	Whole plant	Jaundice Arthritis Diabetes.
45.	<i>Boerhaavia erecta L.</i>	Nyctaginaceae	Tella Atika maamidi	Whole plant	Jaundice A anaemia Urinary problem
46.	<i>Borassus flabellifer L.</i>	Arecaceae	Tati chettu	Leaves	Skinproblems
47.	<i>Brassica juncea Hook &amp;Thoms.</i>	Brassicaceae	Aavaalu	Seed	Snakebite Skin allergies, Boils. Skin diseases.
48.	<i>Bridelia retusa Spreng.</i>	Phyllanthaceae	Koramaddi	Root	Hhepatoprotective.

49.	<i>Bryophyllum pinnatum</i> (Lam).Oken.	Crassulaceae	Ranapala	Leaves	Wounds Scabies Urinary bladder disorders.
50.	<i>Buchananialanzan</i> Spreng.	Anacardiaceae	Saarapappu	Leaves	Leucorrhoea Menorrhoea. Diarrhoea.
51.	<i>Caesalpinia pulcherrima</i> (L.) Swartz.	Fabaceae	Pyditangedu	Stem bark	Abortifacient. Purgative
52.	<i>Caesalpinia sappan L.</i>	Fabaceae	Gacha	Stem bark	Other uses
53.	<i>Calotropis gigantea</i> (L.) Dryand.	Apocynaceae	TellaJilledu	Root	Skin diseases, arthritis Bites. wound healing
54.	<i>Cansjera rheedii</i> J.Gmelin.	Opiliaceae	Mallimaduguteega	Leaves	poisonous bites.Leaves in Diabetes.

## RESULTS AND DISCUSSION

The present study encompasses the in-depth investigation on medicinal plants which are used in by the local healers in the district of Vikarabad, Telangana state. An attempt is made to gather information from the Tribal communities. These communities are directly interlinked with nature and having symbiotic relationship with the medicinal plants in the region. The author has recorded 250 plant species belonging to 80 families Angiospermic families of medicinal plants which are used by the herbal practitioners for treating health care applications Fabaceae is the dominant one with 37 plant species Apocynaceae, Euphorbiaceae, Poaceae, Rubiaceae, Amaranthaceae, Verbenaceae, Cucurbitaceae,

Graph No.1 showing No. of species from some families

The Traditional botanical data obtained from local people revealed that 113 diseases find curative chemical constituents in 250 plant species. It was observed that the number of plant species to cure skin diseases occupy the first place followed by Antidote, Cough, Dental care Diabetes, Diarrhoea, Febrifuge, Jaundice, Leucorrhoea Rheumatic pains Urinary disorders. Asthma The remaining plant species of accounted for the cure of remaining 100 diseases allergy, burns, cancer, cuts, dandruff, epilepsy, hair growth, impotency, lactogoguesleucoderma, obesity, purgatives, sexual vigour (aphrodisiac), The bone fractures, tuberculosis, wounds, and various other diseases also find curative chemicals in the medicinal plants documented from the study site.

## CONCLUSION

The country has a number of alternative medicines, like Ayurveda, Unani, Siddha and Homeopathic systems which are predominantly based on plant based raw materials in most of their preparations and formulations. Herbal preparations for various purposes including pharmaceutical and cosmetic form part of traditional biodiversity uses in India. India is one of the twelve mega biodiversity countries in the world representing 6.5 percent of world's known wildlife and 12 percent of plant life. Of this ten percent of flora is on the verge of extinction, and many more are on the threatened list while some of them are already rare or disappeared due to inhospitable atmosphere created by man to the plants.
